"I would like to thank ThinkLite on a very smooth process. We currently have installed ThinkLite lights in 5 of my locations and the results have been everything they promised. From the inspection by the Sales Team, to the installers the experience has been professional and worth the investment. The lights look great and the stores are better lit as a result of the new LED's. I am a very satisfied customer."

Steve Laramie,
 (Facilities Manager)

"After being quite disappointed with the LED lights another company demonstrated for me, I quickly contacted the ThinkLite representative whom I met at a trade show. His response was timely and he set up a demo immediately. The ThinkLite bulbs were much better but I was still nervous about the final outcome. After the electricians (who were very pleasant) finished, I was impressed with how well the final product looked and how well it made my store look. The overall look was transformed from a dull yellowish hue to a crisp, clean whiter appearance. I am very satisfied."

Bill Goldberg (Owner)

"Since we installed ThinkLite LEDs, our customers have noticed the increased brightness in the store. The employees find it easier to stock shelves and read small labels clearly. The light shines on the products and makes them look great. I can't believe we paid nothing out of pocket for this. It was a great decision!"
